## HANDHELD MULTIFUNCTION METERS / DATA LOGGERS FOR DIGITAL PROBES

#### INTRODUCTION

PRO D01 (1-connector), PRO D05.2 (2-connector) and PRO D05.3 (3-connector) are high class professional multifunction handheld meters with a rich set of features, high grade robustness and operating comfort for safe and reliable use. PRO D05.2 and PRO D05.3 also have data logging capabilities and a USB-rechargeable battery system.

## **FEATURES**

#### Display

The multilingual large dot matrix/clear text LCD has ergonomic wide-angle visibility from daylight to darkness, thanks to the backlight. It displays either large scale values, statistical data or the life chart of measurement history.

The HOLD feature allows freezing the measurements on display, while the REL feature allows showing the measurement against the measured value. Many units of measurement are available, depending on the connected probes.

#### Data Logging (only PRO D05)

Large storage capacity: up to 1 million records, file system based.

The logged data are store in CVS files that can be easily viewed connecting the instrument to a PC via USB: the instrument is seen by the PC as a mass storage device, the data can be read oud and evaluated without software necessarily needed. Automatic log with configurable interval. The comfortable data management software ProXware is downloadable at senseca.com - for free. The instruments integrate a Real Time Clock: date and time of each logged sample are stored.

#### **Alarm**

Configurable alarm thresholds and optionally hysteresis can be set. LCD indication and buzzer activation when thresholds are exceeded.

#### **CONFIGURATION & MEASUREMENT**

#### **Probes**

The meters communicate digitally with the probes of the DX series, allowing the use of longer probe cables (up to 10 m). The wide range of digital probes available allows measuring temperature, pressure (absolute, relative and differential), humidity (relative, absolute, dew point and multiple calculated quantities); photoradiometric quantities, indoor air quality (CO $_{\!\!2}$  and VOC index) and soil moisture. The digital probes are supplied factory adjusted with adjustment data stored internally, allowing for interchangeability without the need for recalibration when changing the probes.

#### Connection to PC

Via the USB C port, for viewing or downloading the files stored in the instrument internal memory (only PRO D05) or connecting to the application software. As soon as connected, the instruments switch supply from battery to USB. Statistics

Detection of MIN, AVG (average) and MAX. The user can clear the statistical info to start a new statistical calculation.

#### **HIGHLIGHTS**

- 1 (PRO D01), 2 (PRO D05.2) or 3 sensor connectors (PRO D05.3)
- Wide range of interchangeable digital probes of DX-series available
- Fast and accurate
- Backlit dot matrix/clear text display, multilingual
- Life chart display
- Data logger with files read out via USB (only PRO D05)
- Min, Avg, Max statistical functions
- Acoustic/optic alarm
- Foldable stand and magnet for flexible operation
- Shock and impact proof, IP 67 waterproof
- NiMH batteries rechargeable via USB (except PRO D01)

## **General specifications**

Inputs PRO D01: 1 PRO D05: 2 or 3

M12 connector for DX digital probes

Storage capacity (only PRO D05)

Up to 1 million data sets, file system based. Each data set includes date/time stamp and measurement of connected probes. Data are stored in CVS files.

Logging type (only PRO D05)

Automatic with manual start/stop

Logging interval (only PRO D05)

1, 2, 5, 10, 15, 30 s / 1, 2, 5, 10, 15, 30 min / 1 hour

Clock User settable RTC

Max. drift 1 min/month @ 25 °C

140 x 160 dot matrix backlit LCD / visible area 42 x Display

Multiple choice of measurement screens:

• Large digit single value

Multi-row

• Statistical info (Min/Avg/Max)

· Life chart view

User interface Multilingual (en, de, it, fr, es)

PC connection **USBC** 

Mass Storage Device (only PRO D05)

## **Ordering codes**

PRO D01	Single-input handheld meter for digital probes. Supplied with 4 x AA alkaline batteries.	
Art.No. 486134		
PRO D05.2	2-input handheld data logger for digital probes. Supplied	
Art.No. 486136	with 4 NiMH rechargeable batteries, USB cable and software downloadable from Senseca website.	
PRO D05.3	3-input handheld data logger for digital probes. Supplied	
Art.No. 486137	with 4 NiMH rechargeable batteries, USB cable and software downloadable from Senseca website.	
Probes must be ordered separately.		

PRO D01 - 1 input, M12 sensor connectors

PRO D05.2 - 2 inputs, M12 sensor connectors

PRO D05.3 - 3 inputs, M12 sensor connectors

#### Attachable probes

#### **T**EMPERATURE

DX 115-00-300-L02 Art.No. 486229

Digital Pt100 immersion probe, wire wound sensor, high precision, stem Ø3 x 300 mm, cable length 2 m.

#### **R**ELATIVE HUMIDITY AND TEMPERATURE

DX 310-00 Art.No. 486793 Digital combined temperature and relative humidity probe, stem Ø14 x 101 mm.

DX 311-L01-00 Digital combined temperature and relative humidity probe, Art.No. 486774 stem Ø14 x 132 mm, cable

length 1 m.
